# Syed Jazib Hassan

Karachi, Pakistan | jazibpf@gmail.com | 0310-6127293 | github.com/gitjaz1

## PROFILE

Computer Science student with hands-on experience building computer-vision tools, solar analysis software, AI workflows, and retrieval-augmented generation (RAG) solutions. Comfortable connecting application logic, data pipelines, and local LLMs for online and offline workflows.

## EDUCATION

**Bachelor's in Computer Science** — Iqra University, North Campus (5th semester)

**Intermediate in Pre-Engineering** — Aga Khan Higher Secondary School, Karimabad Campus (2022)

**Matriculation in Computer Science** — Practical Schooling System, Gulshan Campus (2020)

## PROJECTS

**Solar Lead Engine — Python & Computer Vision** | GitHub

• Developed a modular rooftop-analysis pipeline for roof classification, solar-panel layout optimization, and proposal generation using OpenCV, NumPy, Ultralytics, and PyTorch.

• Built modules for LiDAR processing, solar financial calculations, lead storage, geometric panel-placement validation, image compositing, and PDF generation.

• Exposed functionality through Flask; used Requests and BeautifulSoup for HTTP/HTML processing and ReportLab for proposals.

**Solar Park Ballast Calculator** | GitHub

Calculates zone-based ballast quantities and generates PDF offers with a bill of materials and ballast plans.

**Real Estate CRM** | GitHub

Automates real-estate lead capture and follow-up using n8n, PostgreSQL, Gmail, and Google Calendar.

**RestaurantOS — Local LLM & Automation** | GitHub

Automated restaurant partner onboarding with a local LLM, n8n, Docker, and Slack.

**RAG & Local LLM Workflows**

Worked on retrieval-augmented generation and online/offline tools that use local LLMs.

## EXPERIENCE

**Sales Officer (3D Art)** — Zetechsol Aug 2022 – Dec 2022

Sold 3D art services to prospective clients and built client relationships.

**Telegram Community Moderator** — Freelance Dec 2020 – Feb 2021

Moderated a cryptocurrency-focused community, answered member queries, and enforced community guidelines.

## SKILLS

**Computer Vision & AI:** Python, OpenCV, NumPy, Ultralytics, PyTorch, RAG, local LLM integration
**Automation & Backend:** n8n, Flask, PostgreSQL, Docker, Slack API, PDF generation, online/offline workflows
**Web & Tools:** JavaScript, HTML/CSS, Requests, BeautifulSoup4, Git/GitHub
